## OUR CORE SERVICES

Home Care encompasses a range of services from housekeeping to advanced nursing. Integrity Home Care + Hospice partners with you and your family to design a care plan that addresses every area of necessity, and adjusts the plan if your needs, health or circumstances change.

Hospice is a concept of care for the terminally ill that affirms life and focuses on filling your time, and your family's time, with quality moments. Our team of interdisciplinary specialists create a holistic care experience as you near the end of your journey, and provide ongoing support for your family.

Home Health provides you with short-term, one-on-one care after hospitalization, injury, illness or surgery. This service can complement longer-term home care services, aid in transitioning from a facility to ensure safety, improve function and prevent re-hospitalization.

Our Pediatric care team partners with you to provide care, support and guidance at every stage of life. Services range from personal care assistance to advanced nursing—at home, school and everywhere in between. Pediatric care helps your family live a life that isn't limited by disability or illness.

## ADDITIONAL SERVICES

### CLINICAL CARE NAVIGATION

Some needs are more complicated than others. Clinical Care Navigation assigns a designated RN to step in to coordinate care in the case of: multiple chronic illnesses, a terminal diagnosis, or multiple hospitalizations.

### CONSUMER DIRECTED SERVICES

Consumer Directed Services (CDS) is a Missouri Medicaid-based program that provides personal care attendant (PCA) services if you're disabled and wish to live independently. You direct your own care by hiring and managing attendants to assist with daily activities.

### NURSING SERVICES

Hourly nursing care is designed to help you manage complex medical needs or conditions. A nurse will provide continuous care in shifts from 2 up to 24 hours a day, 7 days a week. If hourly nursing is too much, intermittent nurse visits can also be provided in addition to any other home care service, or on their own.

**IN-HOME SERVICES**

If you qualify, this (IHS) is a Missouri Medicaid-based program that provides you with personal care attendant (PCA), advanced personal care attendant (APCA) and Nursing services to enable you to live an independent life.

**INTEGRITY MEDICATION MANAGEMENT**

The importance of getting the right medication at the right time, each time, can't be stressed enough. CarePak dispenses prep-sorted packages, clearly marked with date and time to be taken. [Learn More.](#)

**CHRONIC CARE MANAGEMENT**

Chronic Care Management (CCM) is a care management tool used to increase quality and coordinate care between all disciplines. CCM is provided by a licensed healthcare professional on behalf of the physician/provider.

**LIFELINE**

For many people living alone, the fear of falling or becoming unable to reach for help is paralyzing. Lifeline enables individuals to live life with confidence.
